

Sensible

Internship: Clinical Relations

Delft ~ 40 hrs

The most important people involved with the design and development of medical innovations are the end users. At Sensible, we are looking for students from a broad range of backgrounds (Clinical Technology, Medicine, Biomedical Engineering, Design) to make sure that we are designing the right things the right way. This entails connecting to new clinical partners and patients as well as existing ones.

you

- Like complex projects
- Like to take charge of your time
- Are a student in Clinical Technology, Medicine, Design, or a related field
- Have an affinity with healthcare and people
- Are a convincing presenter with strong visual skills

we

- Are creating a new kind of glucose sensor for diabetics
- Work together closely with hospitals and patients
- Are an international, diversely experienced team
- Offer a flexible schedule
- Like to have a drink on Fridays (and sometimes other days)

Let's Do It!
